Message from the Research Team

Hot on the heels of another wave in the COVID-19 pandemic and the social distancing edicts, it is very gratifying to see the continued progress in our research efforts during these daunting times. It is especially delightful to see distinction spanning the spectrum of our Division, from its leader to its newest members and right into the wellspring of the future, namely the successful researchers being mentored by our faculty. The Centre for Cardiovascular Innovation- Centre d'Innovation Cardiovasculaire (CCI-CIC) also continues to mature and has allowed the Division to begin to associate with a growing number of research experts with whom the Division members can flourish in the future. It is important for us to reinforce the philosophy of parallel but interdependent development of the Division (notably CAPP) and CCI-CIC. The Division will continue to focus primarily on research mentorship that helps to bring good ideas to a level of strength that achieves funding, while CCI-CIC will provide the sophisticated machinery that ensures successful execution of these funded ideas. In the process, the vast array of knowledgeable personnel who can advise and help with everything from statistics to off-site ethics approvals will be much more readily available to all of us, right in our own backyard. It has been a very exciting few months and the fruits of this effort now will be plentiful for decades to come. Congratulations to all who have continued to expand the Division's research and who continue to optimize clinical care through their impactful ideas.

Sincerely,
G. B. J Mancini, M. Deyell, and N. Carbert
