### Message from the Research Team

Dear Colleagues: We are delighted to update you on the research achievements over the past 7 months. Our quarterly cycle has slipped a bit due to the incredible pace and progress in the development of the Cardiovascular Centre for Innovation which has further enhanced access to high quality grant development and grant execution capabilities for the Division.

Even so, we document the continued productivity of all members both in publications and in promulgation of their successes through national and international speaking invitations. It is especially rewarding to note the Faculty's recognition of this research transformation of the UBC Division through the recognition of Dr. Sidhu's tremendous efforts as Administrative Research Director for the Division and now for CCI-CIC. She continues to be an integral support to Nicole Carbert, her successor, and continues to meet with us to ensure optimal synergy between the Division and CCI-CIC. Moreover, the Division remains strongly represented in all key CCI-CIC decision-making committees including, for example, the Operations Committee.

We are also delighted to showcase our career development role through CAPP Pilot Project funding success of Dr. Christina Luong and the continued national and international success of her research mentor, Dr. Teresa Tsang. We sincerely congratulate the entire research enterprise for these tremendous achievements.

Sincerely, G B John Mancini, Marc Deyell, Nicole Carbert.
